EDUCATION

Augusta University May 2027
Bachelor of Science, Cybersecurity | Augusta, GA

CERTIFICATIONS

CompTIA CySA+: June 2026 | Google AI Essentials: May 2026 | CompTIA Security+: May 2025
GIAC Foundational Cybersecurity Technology (GFACT): Sep 2023

EXPERIENCE

SIEGE CyberOps Jan 2026 – Present
Assistant Cybersecurity Engineer

- Configure and maintain Microsoft Sentinel, Tenable, and ServiceNow across endpoints, servers, and networks; integrate endpoint detection and response and network micro-segmentation.
- Investigate Sentinel and Defender alerts, analyze logs, and escalate confirmed threats to support incident containment.
- Assess vulnerabilities with Tenable, prioritize findings, and coordinate remediation and patch deployment with IT teams.
- Manage ServiceNow tickets for VPN access, privileged accounts, and vulnerabilities; maintain audit trails and meet SLAs.

PROJECT / COMPETITION EXPERIENCE

RoomShift – SwampHacks XII Oct 2026
Project Lead / Integration / AI / Deployment | Devpost

- Led a team project building a cooperative mixed-reality puzzle game with private clues, phone-camera object scanning, and synchronized multiplayer puzzles.
- Integrated a React/TypeScript PWA, on-device object detection, and a Three.js facility with a server-authoritative game engine on Cloudflare Workers and Durable Objects.

VR Teleport (SIMULACRA) – HackGT 13, Georgia Tech Sep 2026
Team Member | Devpost

- Collaborated on desktop and Meta Quest 3 telepresence using React, Three.js, WebXR, and WebRTC, with flat, 360°, and stereoscopic 180° viewing and dual-webcam capture.
- Contributed to testing, debugging, and integration of Node.js, Express, Socket.IO, JWT authentication, and STUN/TURN connectivity.

Home Security Lab – Proxmox Homelab and Media Server May 2026

- Deployed Proxmox VE virtual machines and containers for enterprise infrastructure simulation and cybersecurity testing.
- Configured Tailscale for secure remote management and Jellyfin media access, with local Samba file sharing.

NCAE Cyber Games Feb 2026

- Contributed to a fifth-place regional CTF team; solved cryptography, web exploitation, and Tor onion-service challenges.
- Exploited HTTP vulnerabilities, reverse engineered corrupted Java files, and analyzed Splunk and CrowdStrike logs for indicators of compromise and incident response.

Collegiate Penetration Testing Competition (CPTC) Nov 2025

- Performed authorized Windows, Linux, web, and network penetration testing with Nmap, Burp Suite, Metasploit, and Wireshark; documented attack paths, exploit impact, risk severity, and remediation.

Collegiate Cyber Defense Competition (CCDC) Feb 2025

- As SSH Admin, defended enterprise systems against live attacks while maintaining uptime; deployed Fail2Ban, rkhunter, and ClamAV, hardened and patched systems, and documented incidents.

SKILLS

Languages: Python, JavaScript, Java, SQL, HTML, CSS
Security: Microsoft Sentinel (SIEM), Defender, CrowdStrike, Splunk, Tenable, ServiceNow, Cisco Umbrella, Absolute, Nmap, Metasploit, Burp Suite, Wireshark, WhatWeb, DirBuster, Tor Browser, Fail2Ban, rkhunter, ClamAV
Operating Systems: Windows 10/11, Kali, MacOS, Ubuntu, Raspberry Pi
Infrastructure: Proxmox, Tailscale, virtualization, TCP/IP, IPv4/IPv6, DNS filtering, firewall configuration, network troubleshooting, system hardening and patching, incident response
